# VSSL

## Your Brand of choice for Smart Audio Automation

VSSL

### Who is VSSL?

VSSL is a producer of intelligent audio streaming amplifiers designed to stream music to home systems, allowing multiple rooms to play in complete unison with various user playlists connected and playing simultaneously.

### In partnership with TruAudio

TruAudio is a market-leading manufacturer of cutting edge speaker technology. With innovation at its core, TruAudio strives to raise the bar for speaker design. After having designed and installed thousands of home theatres and multi-room audio systems, TruAudio aims to enhance a user's audio experience as no other architectural speaker can.

Together, VSSL and TruAudio offer a smart audio solution that supports mobile devices and apps such as Alexa and Siri, making it easy for users to use their exclusive native streaming and voice command prompts to deliver a fully immersive home automation system.

## Aqara Products and Applications

Aqara's original home technology provides affordable smart home solutions that are reliable, easy to use, and available to anyone who wishes to simplify their homes. Users of these innovative devices can enjoy the feeling of the home remotely from anywhere, made possible by Aqara sensors that monitor and communicate any activity to the owner 24/7. With these novel home solutions, you can turn your lights on, track movement inside your home, close your curtains when you're running late, and set the home temperature to prepare for your arrival.

## Who is Milesight?

Milesight is a manufacturer of the best-in-class Internet of things (IoT) products with a specialised focus on agriculture and intelligent building environments. Milesight brings together the complexity of security, connectivity and communication and magically interweaves these components to deliver an integrated and formidable IoT solution.

## Milesight Products and Applications

Milesight's technologies contribute tremendously to the agricultural market by providing intelligent sensors capable of analysing and monitoring soil conditions to ensure successful cultivation and optimal yield. The agricultural sector can now save costs, time, effort and produce more with Milesight's broad range of sensors, controllers and LoRaWAN gateways.

# ring

## Who is Ring?

Ring is a home security product line from Amazon. Their products are designed specifically with aesthetics and ease of use in mind. Ring was introduced in South Africa in 2018 and has seen a great uptake amongst security estates and all kinds of residential environments.

## Ring Products and Applications

A security system for all types of homes. With Ring, you are now allowed to monitor all kinds of activities at your front door 24/7, with an added feature to two-way talk and welcome your visitors. All feeds and recordings are captured in the highest quality and are securely stored on Ring's cloud storage facilities, allowing only the account holder access. These products are highly durable and can withstand periods of harsh weather and darkness, thanks to their robust weather-resistance exterior.
